技术规格

Background:	Caltractin belongs to a family of calcium-binding proteins and is a structural component of the centrosome. The high level of conservation from algae to humans and its association with the centrosome suggested that caltractin plays a fundamental role in the structure and function of the microtubule-organizing center, possibly required for the proper duplication and segregation of the centrosome.
Applications:	ELISA, IHC
Name of antibody:	CETN2
Immunogen:	Fusion protein of human CETN2

Full name:	centrin 2
Synonyms:	CALT; CEN2
SwissProt:	P41208
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human thyroid cancer
IHC Recommend dilution:	200-400
