

FGL1 抗原(重组蛋白)

- 中文名称: FGL1 抗原(重组蛋白)
- 英文名称: FGL1 Antigen (Recombinant Protein)
- 储存: 冷冻(-20℃)
- 相关类别: 抗原

概述

Fusion protein corresponding to a region derived from 23-312 amino acids of human FGL1

技术规格

Full name:	fibrinogen-like 1
Synonyms:	HFREP1; HP-041; LFIRE1; LFIRE-1
Swissprot:	Q08830
Gene Accession:	BC007047
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Fibrinogen-like 1 is a member of the fibrinogen family. This protein is homologous to the carboxy terminus of the fibrinogen beta- and gamma- subunits which contains the four conserved cysteines of fi brinogens and fibrinogen related proteins. However, this protein lac ks the platelet-binding site, cross-linking region and a thrombin-sen sitive site which are necessary for fibrin clot formation. This protein may play a role in the development of hepatocellular carcinomas. F our alternatively spliced transcript variants encoding the same prote in exist for this gene.
